

# AVIN SAJI

## FULL-STACK SOFTWARE ENGINEER

+91 6238549453 | avinsaji.199@gmail.com | Bengaluru, India | LinkedIn: [Avin Saji](#)

### SUMMARY

Full-stack Software Engineer with hands-on experience building Java and Spring Boot backend services, REST APIs, and Angular (with working exposure to React) front ends for large-scale enterprise platforms. Skilled in designing and deploying containerized microservices on AWS (Lambda, EC2, API Gateway, ECS, DynamoDB, Docker), working with NoSQL databases (MongoDB, DynamoDB, Redis), and integrating secure payment gateways. Comfortable operating in Agile teams, participating in code reviews and sprint ceremonies, and taking ownership of features from design through production deployment.

### TECHNICAL SKILLS

- **Languages:** Java, JavaScript, TypeScript
- **Frontend:** Angular, React (working knowledge), HTML5, CSS3, Ionic Framework
- **Backend & APIs:** Spring Boot, REST APIs, Microservices Architecture, NoSQL (MongoDB, DynamoDB), Redis, Firebase
- **Cloud & DevOps:** AWS (Lambda, EC2, API Gateway, ECS, DynamoDB, S3, SES, Amplify), Docker (containerization & ECS deployment), CI/CD pipelines
- **Tools & Practices:** Git, Bitbucket, Postman, Agile/Scrum, Unit Testing, Code Reviews

### WORK EXPERIENCE

#### Software Development Engineer

July 2024 – Present

Kristu Jayanti Software Development Center | Bengaluru, India

- **Production Deployment Lead:** Solely responsible for deploying and managing the KJUSYS ERP on AWS production environments, ensuring 99.9% uptime.
- **Cloud & Microservices:** Configured EC2 instances and API Gateway to manage traffic routing and load balancing across backend microservices.
- **Backend Development:** Engineered core ERP REST services (Fee Structures, Payslips) using Java and MongoDB, integrating Redis caching to reduce report generation time by 30%.
- **Database Architecture:** Designed the complete database schema for ERP modules, migrating legacy SQL data to optimized NoSQL (MongoDB) structures.
- **Spring Boot & Containerization:** Built a Job Portal application using Spring Boot, containerized it with Docker, and deployed it on AWS ECS.

#### Software Development Engineer Intern

January 2024 – June 2024

Kristu Jayanti Software Development Center | Bengaluru, India

- **Backend Development:** Integrated Razorpay and Easebuzz payment gateway APIs to facilitate seamless fee collection.
- **Migration:** Assisted in the architectural migration of the college's legacy systems to a modern tech stack, enhancing project success rates by 10%.

#### Remote Web Development Intern

April 2023 – June 2023

Rats Technologies | Bengaluru, India

- Developed a hybrid mobile application using the Ionic Framework.

### KEY PROFESSIONAL PROJECTS

#### KJUSYS ERP (Comprehensive Education Management System) — Java, Angular, MongoDB, Redis, AWS (Lambda, S3, SES)

- Reduced report generation load times by 30% by implementing Redis caching for frequently accessed data.
- Developed the Payslip Generation Service and Fee Generation Structure, ensuring zero-error financial processing.
- Deployed AWS Lambda functions to synchronize payment data in real time and used Amazon SES for transactional emails (payslips, notifications).

#### Smart Interview Management System — Java, Angular, MongoDB

- Built core backend logic to handle concurrency, allowing multiple panelists to interview candidates simultaneously without data conflicts or scheduling overlaps.

**Admission Form Builder** — *Java, Angular*

- Engineered a custom low-code form builder with dynamic UI generation for admission staff.

**Learning Management System (LMS)** — *Ionic, Angular, TypeScript, Firebase*

- Implemented real-time data synchronization for course content and user progress tracking across devices.

**Job Portal Application** — *Java, Spring Boot, Angular, Docker, AWS ECS*

- Built the backend using Spring Boot and containerized the application with Docker for consistent, portable deployments.
- Deployed and managed the containerized application on AWS ECS.

**Alumni Portal** — *Angular, AWS DynamoDB*

- Managed database design and data operations on AWS DynamoDB to support alumni records and engagement tracking.

**EDUCATION**

---

**Master of Computer Applications (MCA)**

June 2022 – June 2024

Bangalore North University | 80% | Distinction

**B.Com (ACCA)**

July 2019 – May 2022

Symbiosis College of Arts and Commerce | 77% | Distinction

**Senior Secondary School**

2017 – 2019

Al Alia International School

**OTHER PROJECTS & VIRTUAL EXPERIENCE**

---

- Software Engineering Virtual Experience (JP Morgan Chase):** Gained insight into Agile software development processes and version control (Git) in a corporate setting.
- Software Engineering Virtual Experience (Electronic Arts):** Explored object-oriented design patterns used in game development.

**PUBLICATIONS**

---

- Research Paper:** "Enhancing Customer Retention in Telecom: A Churn Analysis Approach" — presented at the National Student Research Symposium; analyzed customer data patterns to predict churn using data mining techniques.
